

# OASIS

## Onsite Aviation Inspection Service & Independent Survey

### Outline of Services

#### **Onsite Aviation Inspection Service & Independent Survey (OASIS)**

- Aircraft Condition Inspections
- Records Inventory and Review
- Pre-purchase Monitoring and review
- Asset Verification Inspections
- Return From Lease Inspections

**Aircraft Condition Inspections:** This service would benefit an Aircraft owner or bank that has the aircraft on lease or financed or an aircraft that would be going on the market soon. This is a physical inspection of the Aircraft and Records to get an independent review of the paint and interior, overview of the records and overall condition of the aircraft for continued use or to place on the market for sale.

**Records Inventory and Review:** This service would benefit an owner of an Aircraft just purchased or as a preparation to place an aircraft on the market. Also a bank or leasing company may benefit from this review once a year for financed or leased aircraft. This service would include the Aircraft Condition Inspection along with a detailed records inventory and review.

**Pre-purchase Monitoring and Review:** This service is for a Seller or Purchaser of an aircraft going through a pre-purchase inspection. This is an onsite service to oversee the inspection and provide daily updates on the status.

**Asset Verification Inspections:** This service is for aircraft owners or banks that have an aircraft leased or financed. This service will include verification of engine serial numbers and aircraft documentation and the Aircraft Condition Inspection and overview of the records.

**Return From Lease Inspections:** This service is for aircraft owners and banks that have an aircraft coming off of lease. This should be performed in conjunction with an independent service center inspection and a Records Inventory and Review.

Subject to formal quotation, above services will be performed at an "Industry-Standard" flat rate per day plus documented airfare and hotel expenses up to \$500.00 per day. Depending on the aircraft and services requested, the above can be completed in one day. For International rates a formal quote will be submitted on a case by case basis.
